SUMMARY

Diploma candidate in Computer Science (AI/ML) with hands-on experience building AI-driven web applications, machine learning pipelines, and workflow automations. Comfortable across the development lifecycle — implementation, testing, and documentation — and seeking a Technology Internship contributing to software development, ML model integration, and secure application practices.

EDUCATION

Diploma in Computer Science & Engineering (Specialization in AI/ML)

M.S. Ramaiah Polytechnic, Bengaluru | July 2024 – July 2027

- Current Cumulative GPA: 8.0+ / 10.0 (through 4th semester)

TECHNICAL SKILLS

AI & Machine Learning: PyTorch (LSTM, Neural Networks), Prompt Engineering, Nvidia NIM, Google AI Studio

Cloud & DevOps: Google Cloud Platform (GCP), Docker, Vercel, GitHub Actions/Codespaces, Linux (CachyOS), WSL

Databases & Automation: Supabase, SQL, n8n Workflow Automation

Core Concepts: Data Structures & Algorithms, Digital Signal Processing, Software Architecture, Secure Application Practices

Programming Languages: Python, Java, JavaScript/TypeScript, SQL (Basic: Rust, Go)

PROJECTS

Try-on Virtual Exhibition | PyTorch, Vercel, Supabase

October 2025 | github.com/Kushalongit-hub/Try-On/

- Engineered an AI-powered virtual try-on web application for fashion and beauty product visual rendering.
- Deployed backend services using containerized endpoints and serverless hosting for low-latency inference.

Repo-Analyzer (Yoda) | Python, Gemini API / LLMs, Streamlit

March 2026 | github.com/Kushalongit-hub/Repo-Analyzer

- Developed an automated repository audit tool generating due-diligence reports for GitHub repositories.
- Applied prompt engineering and static code analysis to summarize codebase quality within minutes.

Simple YT DLP | Python, CustomTkinter, yt-dlp

August 2026 | github.com/Kushalongit-hub/Simple_YT_DLP

- Built a cross-platform media downloader GUI featuring dark mode and asynchronous download handling.

Stock Market Predictor (In Progress – 5th Sem Project) | Python, PyTorch / LSTM

September 2026

- Implementing time-series deep learning models (LSTM) to forecast cryptocurrency price trends (BTC).

TRAINING & WORKSHOPS

- AI Research Foundations — Google DeepMind (Ongoing)
- AI/ML Sprint Technical Workshop — M.S. Ramaiah Institute of Technology (MSRIT)
